Minutes of previous meetings can be found on our website here: ___

Progress Report	
Personal Goal:	
Progress: 0/1/2/3	
Zone Goal:	<ul style="list-style-type: none">- Graduation systems: Work on graduation systems for JH students; develop a system for students to be able to graduate with the cohort of their choice. The Graduation Team has however gotten back to me saying that it would not be possible to work this out this year and they will consider this for action in the next academic year.- Rep Community: The Joint Honours sector in terms of representation requires more structure. Currently working on grouping Course Reps and plan to further group all Joint Honours students under them (Course Reps required to create and manage their respective student groups for feedback, suggestions and concerns, to be able to spot cross-faculty JH issues.) I have been unable to get sufficient feedback from the Reps however. I will be going over this issue once again in the next few weeks.
Progress: 2	

	<ul style="list-style-type: none"> - Feedback: Work with the Insights Team to use Joint Honours survey that was created last year to get more information about what students think about their courses. I will be meeting with Insights Manager Martin about a survey regarding this in the coming weeks. - Database and mailing list: Kickstart the creation of a comprehensive database of Joint Honours courses including the faculties, the respective majors and minors involved as well as the staff points of contact and under what faculty they would be. I will be speaking to Christie (Representation Coordinator) next week about the mailing list. The database will be looked into over the course of the next few months.

<p>Future Plans/AOB</p>
<ul style="list-style-type: none"> - Social events: Find out about JH students’ access to social and academic events of their faculties and increase access to events organized by both faculties (in the absence of monetary constraints, which would mean working on the communication of all such events to students). - Terminology: Agree upon the final terminology for the Joint Honours sector and how different courses are named within this.
