

	What is the idea?	What do you hope to achieve/ how will you achieve it?	Who will you be working with?	When do you expect to be finished (term)?
Society Promotion and Support	Screens - ideal would be securing one anywhere but Plant Pot for society use.	Meet with Marketing to discuss screen availability and plan for making it worthwhile. Make a rota for screen time and asking societies to send in artwork/graphics/ even photos to celebrate their achievements. Pushing hard for signups via Friday email and instagram accounts to ensure the schedule is full. Outcome should be that the screen is used enough to become a permanent fixture. Advertising will focus on the Shop screen as this is the much superior place for promo.	Marketing team and societies	This is up and running now.
	Society instagram account	As above meet with Marketing to plan a pitch. Take a lot of inspiration from team_soton to plan the structure of the year - should be a lot of grid-wise reposting graphics pre-events, and photos post-events, obviously in consultation with what societies actually want. Advertising for PA committee elections and other relevant student elections. Story wise updates from attending events. Would also be a primary means of communication via dming to ask for opinions, arrange meetings etc for students who feel more comfortable with less formal communication. Pitch - use the same document. Get opinion from the Activities Team. Turning colours to burgandy schemes. Canva templates. -Society of the month takeover platform? Ask Marina what she wants to do about this.	Marketing team for set up, societies for content.	Same as above
	Society tasters	Societies run these according to their own preferred times but the timetable posts on the Instagram introduce a sense of structure and unity and increase awareness.	Societies	Freshers completed, will repeat in refreshers
	Accreditation and Groups Hub standardisation	Work with the Activities Team throughout the year to sort out what this should look like. Possible incentives - accreditation? Do a plan with what incentives would be - gather insights. Simplify the structure. EDI focus. What they're doing, why they're doing it, what rewards there are. Link this in with groups hub structure.	Activities and website design	Whole term project.
	Bookable sessions for current issues - eg grant rounds	Meeting with societies by demand.	Societies	Preparing for Grant round two - run up to Christmas
	Website section for societies who offer service	Creating a new platform for the website. tied into Cost of Living campaign as it is win-win.	Activities, marketing, website development and interested societies	Should be done in term 1.
	More/better space for PA socs, and other uni collaboration with societies	Working with Louise Coysh to input society needs into the university plans; generally throughout the year to encourage uni endorsement.	Louise Coysh and PA socs for opinions	Whole term project.
Welfare and student safety	Period products in bathrooms and concourse	Baskets in the bathrooms and a big cardboard bin in the concourse, in collaboration with Once A Month.	Advice Centre and Once A Month	Should be done in term 1.
	Gender recognition fund	Firstly getting feedback from trans and NB students of what they want this to look like and then pitching for a grant from the welfare fund.	Advice Centre and students	Potentially a whole term project
	Liberation campaigns - working with socs	Working with the relevant socs and liberation officers to ensure every campaign is as representative as possible.		
	Charter and the rest of SUSUSafe.	Consulting with interested students and finalising with Ed and Advice.
