

Hi

I'm Chidiogo from the Law School, studying Maritime Law. I have held various leadership positions through which I influenced positive changes and helped resolve difficult challenges. I intend to bring this wealth of experience to SUSU to help address some of the challenges the student populace is faced with.

Some of the issues requiring urgent attention range from academic concerns such as no lecture-recording, to lack of active awareness about student privileges and opportunities. These are basic things that enhance students' university experience. And the littlest things matter!

The outgoing Sabb Officers scored notable successes, however, I believe that there is still more we can achieve together.

If elected, I will build upon the existing structures, as well as take innovative initiatives and actions to better the welfare of all students. Let me be your voice and a steady hand to navigate our union to even greater heights.
