

I come from a multicultural heritage, I was born and raised in Goa, India. It is a state that has a diverse ethnic population. Being half Portuguese and half Indian and having worked in the hospitality industry for a couple of years, I have first-hand experience in understanding the problems faced by people of various backgrounds. I have an out-going, easy to talk to personality and I am proactive when it comes to making decisions. I am a strong supporter of income-equality and equal rights for every individual.

If I do get elected, I intend to bring about awareness of the various facilities available to students, especially in terms of mental health support. I also intend to make recording videos a mandate for lecturers. I would also work on lowering the prices of the susu store and try to offer free sanitary pads for women. One more issue that I would like to address is the lack of free water dispensers in our university. Another place I want to bring about improvement is student entertainment. I have previously worked in the nightlife industry and I feel that the Stag's and Bridge has a lot more potential. I would also like to increase the number of safety busses.
