

## Risk Assessment

<b>Risk Assessment for the activity of</b>	<b>Edinburgh Fringe Fundraiser Quiz</b>  The quiz will be at 'The Bridge' on 25th May 2024, with Tours Officer, Lily Akers, setting up at 7.00pm and the rest of the society joining from 7.30pm. The Tours Officer will be hosting the quiz.	<b>Date</b>	<b>01/05/2024</b>
<b>Unit/Faculty/Directorate</b>	<b>Theatre Group</b>	<b>Assessor</b>	<b>Lily Akers</b>
<b>Line Manager/Supervisor</b>	<i>Kat Fevyer</i>	<b>Signed off</b>

Alcohol poisoning	Participants have access to the bar and may consume too much alcohol. This could result in a loss of consciousness or self-control.	Event organisers, event attendees	2	5	10	<p>- The event will be run by the societies committee, specifically the Tours Officer who will monitor the event, and ideally try to avoid no-one drinking in excess amounts. But, members are responsible for their own safety.</p> <p>- Staff at the bar should watch for excessive drinking and watch people who are believed to have consumed a lot of alcohol. Report any suspicious behaviour to staff.</p> <p>- As we are on campus, we can access 'SUSU safe'. Stop topups should be accessible at the bar to avoid potential spiking, the SUSU safety bus is available to ensure safety when returning home.</p>	2	3	6	<ul style="list-style-type: none"> <li>• Members are responsible for their individual safety though and are expected to act sensibly when walking around. For anyone who is too inebriated it will be suggested to them that they should return home.</li> <li>• Follow <a href="#">SUSU incident report policy</a></li> <li>• All incidents are to be reported on the as soon as possible, the societies welfare officers will be informed so they can follow up on any issues</li> <li>• If attendees need to go to hospital, they will be accompanied there</li> </ul>

# University of Southampton Health & Safety Risk Assessment

Version: 2.3/2017

## Assessment Guidance

1. Eliminate	Remove the hazard wherever possible which negates the need for further controls	If this is not possible then explain why	
2. Substitute	Replace the hazard with one less hazardous	If not possible then explain why	
3. Physical controls	Examples: enclosure, fume cupboard, glove box	Likely to still require admin controls as well	
4. Admin controls	Examples: training, supervision, signage		
5. Personal protection	Examples: respirators, safety specs, gloves	Last resort as it only protects the individual	

LIKELIHOOD	5	5	10	15	20	25
	4	4	8	12	16	20
	3	3	6	9	12	15
	2	2	4	6	8	10
	1	1	2	3	4	5
		1	2	3	4	5
		IMPACT				

### Risk process

- Identify the impact and likelihood using the tables above.
- Identify the risk rating by multiplying the Impact by the likelihood using the coloured matrix.
- If the risk is amber or red – identify control measures to reduce the risk to as low as is reasonably practicable.
- If the residual risk is green, additional controls are not necessary.
- If the residual risk is amber the activity can continue but you must identify and implement further controls to reduce the risk to as low as reasonably practicable.
- If the residual risk is red do not continue with the activity until additional controls have been implemented and the risk is reduced.
- Control measures should follow the risk hierarchy, where appropriate as per the pyramid above.
- The cost of implementing control measures can be taken into account but should be proportional to the risk i.e. a control to reduce low risk may not need to be carried out if the cost is high but a control to manage high risk means that even at high cost the control would be necessary.

Impact		Health & Safety
1	Trivial - insignificant	Very minor injuries e.g. slight bruising
2	Minor	Injuries or illness e.g. small cut or abrasion which require basic first aid treatment even in self-administered
	Likelihood	
1	Rare e.g. 1 in 10,000 chance or higher	
3	Moderate	Injuries or illness e.g. strain or sprain requiring first aid or medical support
	Likelihood	
2	Unlikely e.g. 1 in 1,000 chance or higher	
3	Possible e.g. 1 in 100 chance or higher	
4	Major	Injuries or illness e.g. broken bone requiring medical support >24 hours and time off work >4 weeks.
	Likelihood	
4	Likely e.g. 1 in 100 chance or higher	
5	Very Likely	
5	Severe - extremely significant	Fatality or multiple serious injuries or illness requiring hospital admission or significant time off work.
