Large crash or fall while skiing/snowboarding. May involve falling from low height during a jump or crashing into people or equipment such as boxes or rails	Various forms of injuries up to and including concussion, sprains, breakages and dislocation	All participants and organisers/staff and spectators as well as members of the public who may be walking past	2	5	10	Participants must agree that they will only ski/snowboard within their ability and take have lessons if unable to control and stop safely.  Briefing participants on how to stay safe and stay within their ability.  Ensure correct attire and PPE is worn.  Ensure all participants are properly insured, stay in groups and know the correct emergency number.	1	4	4	If the person who has fallen or been hit is showing signs of concussion or is confused, seek medical attention immediately.  Call local emergency number (112) in an emergency.  Any incidents need to be reported as soon as possible ensuring duty manager/health and safety officers have been informed. Follow SUSU incident report policy.

**PART B – Action Plan**

**Risk Assessment Action Plan**

Part no.	Action to be taken, incl. Cost	By whom	Target date	Review date	Outcome at review date
1	Before booking trip organisers to investigate country information and region safety via government FCO Website- <a href="https://www.gov.uk/foreign-travel-advice">https://www.gov.uk/foreign-travel-advice</a>	William Raftery			
2	Organisers to ensure appropriate travel insurance has been secured by/for each participant	William Raftery			
3	Participant briefing on health & safety before trip e.g. meeting, online, emails (including consular and emergency services information)	William Raftery			
4	Trip itinerary and details of hotels/flights shared with all participants	William Raftery			
5	Participants emergency contact details gathered by organisers- stored securely in accordance with GDPR guidelines	William Raftery			
6	Organisers to check and pack a first aid kit	William Raftery			
7	Organisers Severe Weather and Natural Disaster Check prior to departure	William Raftery			
8	Transport- where student drivers and hire vehicles to be used ensure company vehicle safety checks area carried out, and research laws on licencing  Book appropriate travel insurance/cover	William Raftery

				Date: 15/03/2024	

## Assessment Guidance

1. Eliminate	Remove the hazard wherever possible which negates the need for further controls	If this is not possible then explain why	
2. Substitute	Replace the hazard with one less hazardous	If not possible then explain why	
3. Physical controls	Examples: enclosure, fume cupboard, glove box	Likely to still require admin controls as well	
4. Admin controls	Examples: training, supervision, signage		
5. Personal protection	Examples: respirators, safety specs, gloves	Last resort as it only protects the individual	

LIKELIHOOD	5	5	10	15	20	25
	4	4	8	12	16	20
	3	3	6	9	12	15
	2	2	4	6	8	10
	1	1	2	3	4	5
		1	2	3	4	5
		IMPACT				

### Risk process

1. Identify the impact and likelihood using the tables above.
2. Identify the risk rating by multiplying the Impact by the likelihood using the coloured matrix.
3. If the risk is amber or red – identify control measures to reduce the risk to as low as is reasonably practicable.
4. If the residual risk is green, additional controls are not necessary.
5. If the residual risk is amber the activity can continue but you must identify and implement further controls to reduce the risk to as low as reasonably practicable.
6. If the residual risk is red do not continue with the activity until additional controls have been implemented and the risk is reduced.
7. Control measures should follow the risk hierarchy, where appropriate as per the pyramid above.
8. The cost of implementing control measures can be taken into account but should be proportional to the risk i.e. a control to reduce low risk may not need to be carried out if the cost is high but a control to manage high risk means that even at high cost the control would be necessary.

Likelihood	
1	Rare e.g. 1 in 100,000 chance or higher
2	Unlikely e.g. 1 in 10,000 chance or higher
3	Possible e.g. 1 in 1,000 chance or higher
4	Likely e.g. 1 in 100 chance or higher
5	Very Likely e.g. 1 in 10 chance or higher

Impact		Health & Safety
1	Trivial - insignificant	Very minor injuries e.g. slight bruising
2	Minor	Injuries or illness e.g. small cut or abrasion which require basic first aid treatment even in self-administered.
3	Moderate	Injuries or illness e.g. strain or sprain requiring first aid or medical support.
4	Major	Injuries or illness e.g. broken bone requiring medical support >24 hours and time off work >4 weeks.
5	Severe - extremely significant	Fatality or multiple serious injuries or illness requiring hospital admission or significant time off work.
