| <b>Risk Assessment Information</b><br>(What is this risk assessment for? Please provide a summary of the activity or event, including all relevant information) | <p><b>Socials</b><br/>         SUSSC hosts weekly socials (typically on a Wednesday). These will be held across Southampton at a various number of venues.</p> <p>SUSSC agrees to uphold members behaviour across the entirety of socials, as to maintain our reputation and integrity across Southampton. When a venue is used this will be confirmed with the staff beforehand and at least one committee member will assess the premises for risks and to ensure all safety requirements are met. SUSSC will take responsibility for and damages to the premises and any poor member behaviour.</p> <p><b>Information Stands</b><br/>         For purposes of promoting SUSSC in general, information stands may be set up along with some promotional filming / interviews. Only with prior approval, these will be held on SUSU grounds in the designated areas by the SU. Any set up/down of equipment will only be done by committee members.</p> <p><b>Run Club</b><br/>         The SUSSC run club will run at various times across a week as to best fit members availability but will also be primarily on SUSU ground or in the Southampton Common. These will always have at least one committee member in attendance.</p> <p><b>Race Training</b><br/>         SUSSC hosts bi-weekly ski race training sessions at Alpine Snowsports Aldershot.</p> <p>Members will need to purchase a ticket through the SUSU box office in order to attend.</p> |                   |                                  |            |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>The ticket includes transport which will be from campus either by car (some members may have to give lifts) or minibus.<br/>Equipment is also included and is provided partially by SUSSC and partially by the slope. PPE is provided by the slope.</p> <p><b>Freestyle Training</b><br/>Freestyle training will be held weekly or biweekly depending on slope availability at Calshot Outdoor Activity Centre or at Alpine Snowsports Southampton. Similarly to race training these tickets will be purchased via box office and transport and kit will be included with the ticket price.</p> |

## Assessment Guidance

|                        |                                                                                 |                                                |                                                                                     |
|------------------------|---------------------------------------------------------------------------------|------------------------------------------------|-------------------------------------------------------------------------------------|
| 1. Eliminate           | Remove the hazard wherever possible which negates the need for further controls | If this is not possible then explain why       |  |
| 2. Substitute          | Replace the hazard with one less hazardous                                      | If not possible then explain why               |                                                                                     |
| 3. Physical controls   | Examples: enclosure, fume cupboard, glove box                                   | Likely to still require admin controls as well |                                                                                     |
| 4. Admin controls      | Examples: training, supervision, signage                                        |                                                |                                                                                     |
| 5. Personal protection | Examples: respirators, safety specs, gloves                                     | Last resort as it only protects the individual |                                                                                     |

|            |        |   |    |    |    |    |
|------------|--------|---|----|----|----|----|
| LIKELIHOOD | 5      | 5 | 10 | 15 | 20 | 25 |
|            | 4      | 4 | 8  | 12 | 16 | 20 |
|            | 3      | 3 | 6  | 9  | 12 | 15 |
|            | 2      | 2 | 4  | 6  | 8  | 10 |
|            | 1      | 1 | 2  | 3  | 4  | 5  |
|            | 1      | 2 | 3  | 4  | 5  |    |
|            | IMPACT |   |    |    |    |    |

### Risk process

1. Identify the impact and likelihood using the tables above.
2. Identify the risk rating by multiplying the Impact by the likelihood using the coloured matrix.
3. If the risk is amber or red – identify control measures to reduce the risk to as low as is reasonably practicable.
4. If the residual risk is green, additional controls are not necessary.
5. If the residual risk is amber the activity can continue but you must identify and implement further controls to reduce the risk to as low as reasonably practicable.
6. If the residual risk is red do not continue with the activity until additional controls have been implemented and the risk is reduced.
7. Control measures should follow the risk hierarchy, where appropriate as per the pyramid above.
8. The cost of implementing control measures can be taken into account but should be proportional to the risk i.e. a control to reduce low risk may not need to be carried out if the cost is high but a control to manage high risk means that even at high cost the control would be necessary.

| Impact |                                | Health & Safety                                                                                                   |
|--------|--------------------------------|-------------------------------------------------------------------------------------------------------------------|
| 1      | Trivial - insignificant        | Very minor injuries e.g. slight bruising                                                                          |
| 2      | Minor                          | Injuries or illness e.g. small cut or abrasion which require basic first aid treatment even in self-administered. |
| 3      | Moderate                       | Injuries or illness e.g. strain or sprain requiring first aid or medical support.                                 |
| 4      | Major                          | Injuries or illness e.g. broken bone requiring medical support >24 hours and time off work >4 weeks.              |
| 5      | Severe – extremely significant | Fatality or multiple serious injuries or illness requiring hospital admission or significant time off work.       |

| Likelihood |                                            |
|------------|--------------------------------------------|
| 1          | Rare e.g. 1 in 100,000 chance or higher    |
| 2          | Unlikely e.g. 1 in 10,000 chance or higher |
| 3          | Possible e.g. 1 in 1,000 chance or higher  |
| 4          | Likely e.g. 1 in 100 chance or higher      |
| 5          | Very Likely e.g. 1 in 10 chance or higher  |
