						<p>be encouraged to go home ideally with someone else. If required a taxi will be called for them.</p> <ul style="list-style-type: none"> • Be considerate of other pedestrians & road users, keep disturbance & noise down. • Avoid behaviour likely to provoke a disturbance or fights. 				
Spiked drinks/ Alcohol poisoning	Participants may consume too much alcohol during this event or be spiked. This could result in a loss of consciousness or self-control	Event organisers, event attendees,	2	5	10	<ul style="list-style-type: none"> • Supervision, the event will be run by the society committee These attend each venue. Ideally, they will not drink to excess during the event • Bouncers/trained staff in Pubs should watch for excessive drinking and watch people who are believed to have consumed a lot of alcohol. Report any suspicious behaviour to staff. • Participants encouraged to stay with a nominated 'buddy' where possible. • The organisers have confirmed the premise is licensed. Action organisers (b). 	2	3	6	<ul style="list-style-type: none"> • Members are responsible for their individual safety though and are expected to act sensibly when walking around. For anyone who is too inebriated it will be suggested to them that they should return home rather than continue on the social. Taxis will be called if required (look at SUSU safety Bus, Radio Taxis options)

University of Southampton Health & Safety Risk Assessment

Version: 2.3/2017

						<ul style="list-style-type: none"> The consumption of alcohol will take place at licensed premises. The conditions on the licence will be adhered to and alcohol will not be served to customers who have drunk to excess. Action licensee. <u>Games involving binge drinking or the consumption of excessive amounts of alcohol are not to be undertaken.- Society to follow Code of conduct/Expect Respect policy</u> 				<ul style="list-style-type: none"> If they need to go to the hospital they will also be accompanied there. Participants advised to avoid leaving drinks unattended and if you think anything has been added to a drink; report it; try and retain the drink for testing. All incidents are to be reported on the day as soon as possible ensuring the duty manager/health and safety officer has been informed. Follow SUSU incident report policy
Participants getting lost or leaving without any one being aware	During the event participants may decide they want to leave, or they may get lost on the way	Event organisers, event attendees,	3	3	9	<ul style="list-style-type: none"> If a person leaves without warning all efforts will be done to locate them. Stress however that attendees are responsible for their individual safety. 	2	2	4	<ul style="list-style-type: none"> Follow SUSU incident report policy Call emergency services as required

Assessment Guidance

1. Eliminate	Remove the hazard wherever possible which negates the need for further controls	If this is not possible then explain why	
2. Substitute	Replace the hazard with one less hazardous	If not possible then explain why	
3. Physical controls	Examples: enclosure, fume cupboard, glove box	Likely to still require admin controls as well	
4. Admin controls	Examples: training, supervision, signage		
5. Personal protection	Examples: respirators, safety specs, gloves	Last resort as it only protects the individual	

L I K E L I H O O D	5	5	10	15	20	25
	4	4	8	12	16	20
	3	3	6	9	12	15
	2	2	4	6	8	10
	1	1	2	3	4	5
	1	2	3	4	5	
	IMPACT					

Impact	Health & Safety
1 Trivial - insignificant	Very minor injuries e.g. slight bruising
2 Minor	Injuries or illness e.g. small cut or abrasion which require basic first aid treatment even in self-administered.

University of Southampton Health & Safety Risk Assessment

Version: 2.3/2017

3	Moderate	Injuries or illness e.g. strain or sprain requiring first aid or medical support.
4	Major	Injuries or illness e.g. broken bone requiring medical support >24 hours and time off work >4 weeks.
5	Severe – extremely significant	Fatality or multiple serious injuries or illness requiring hospital admission or significant time off work.

Risk process

Likelihood	
1	Rare e.g. 1 in 100,000 chance or higher
2	Unlikely e.g. 1 in 10,000 chance or higher
3	Possible e.g. 1 in 1,000 chance or higher
4	Likely e.g. 1 in 100 chance or higher
5	Very Likely e.g. 1 in 10 chance or higher

Identify the impact and likelihood using the tables above. Identify the risk rating by multiplying the Impact by the likelihood using the coloured matrix.

If the risk is amber or red – identify control measures to reduce the risk to as low as is reasonably practicable.

If the residual risk is green, additional controls are not necessary.

If the residual risk is amber the activity can continue but you must identify and implement further controls to reduce the risk to as low as reasonably practicable.

If the residual risk is red do not continue with the activity until additional controls have been implemented and the risk is reduced.

Control measures should follow the risk hierarchy, where appropriate as per the pyramid above.

The cost of implementing control measures can be taken into account but should be proportional to the risk i.e. a control to reduce low risk may not need to be carried out if the cost is high but a control to manage high risk means that even at high cost the control would be necessary.
